The Infant Center will continue to be filled with magical discoveries, developmental achievements, strides in independence, and, of course, constant affection.

This remarkable program will provide your child the opportunity to socialize and expose him/her to various cognitive and creative activities.

Although all infants have their own individual schedules, each of their days at MA share common features. All of our infants will participate in developmentally appropriate experiences such as water play, art, music and movement, story time, block play, baby massages, tummy time activities, and much more. Each activity will provide frequent opportunities to promote growth in all areas of development: social, emotional, physical, and cognitive.

To participate in our Infant Center summer program, you must have applied and been accepted to the fall 2025 term or be a current student.

We provide a beautiful environment year-round for our toddlers to explore and develop at their individual pace.
